

ACK

- Write it in a way \Rightarrow you do not

- o Mostly cold glue + very bit of hot to avoid saturation.
- o cut filled cells
- o JPH - glue method

3 paths

- Prep H_2SO_4 eluent

Lab plus - follow written protocols

to 350 Braun ^{leas?}

Acknowledge: Take + Elk

- waste tank just, w/ running H_2O

- 6 buttons for instrument

LC software \rightarrow LC

- oven = G

- Autosampler: instr 3

Pump : " 2

Pump Flow: 0.1 \rightarrow "download"

Pressure stable \rightarrow 0.2. Repeat until 0.6. (Should be 800-900 psi)

Label Aus tubes.

Start syringe at 1100. 3. Pump
3 x 60 each sample

Take 400. Put
into inner tube

syr onto filter. Filter plunge
shall H₂O droplets on inner
